For the prevention and cure o
ILIOUS AND MALIGNANT FEVERS
is recommended
HN's ANTI BILIOUS PILLS.
THIS Medicine has been attended
a degree of success highly gratefu
he inventor's feelings in several parts
he West Indies and in the Southern
Middle States, &c.
The testimony of a number of person
be adduced, who have reason to be
e that a timely use of this salutary re-
dy has, under Providence, preserved
ir lives when in the most alarming cir-
nstances.
Facts of this conclusive nature speak
re in favour of a medicine than co
nns of pompous eulogy founded on
re assertion.
It is not indeed presumptuously pro-
sed as an infallible cure, but the inven-
has every possible reason that can re-
lt from extensive experience for be-
ving that a dose of these Pills taken
ce in every two weeks during the pre-
lence of our bilious fevers, will prove
infallible preventive; and further,
at in the earlier stages of those diseases
eir use will very generally succeed in
storing health, and frequently in cases
steemed desperate and beyond the pow-
of common remedies.
The operation of these pills is perfectly
ild, so as to be used with safety by per-
ns in every situation and of every age.
They are excellently adapted to carry
f superfluous bile and prevent its mor-
id secretions—to restore and amend the
ppetite—to produce a free perspiration
nd thereby prevent colds which are of-
en of fatal consequences. A dose never
ails to remove a cold if taken on its first
appearance: they are celebrated for re-
moving habitual costiveness—sickness at
the stomach and severe head-ache—and
ught to be taken by all persons on a
change of climate.
They have been found remarkably effi-
cacious in preventing and curing disor-
ders attendant on long voyages, and
should be procured and carefully preserv-
ed for use by every seaman.

Proposals

FOR Publishing by Subscription, and
now ready for the press, a series of
historical volumes, which when finished
will assume the title of
Universal History Americanised;
Or, an historical view of
Europe, Asia, Africa and America,
from the earliest records to the nineteenth
century—with a particular reference to
the state of society, literature, religion,
and form of government in the United
States of America
BY DAVID RAMSAY, M. D.
"Life is so short and time so valuable,
that it were happy for us if all great
works were reduced to their quintes-
sence." *Sir William Jones.*

PROSPECTUS.

ASIA.

The Asiatic part of this work contains
a general view of the antediluvians—of
the general deluge—of the re-settlement
of the Globe after that great event—of
the primitive postdiluvian nations which
were formed in Asia, the cradle of the
world. Their various ramifications, re-
volutions, and of the general course of
Empire.

AFRICA.

The African part, contains a concise
history of Egypt, Carthage, Numidia,
Mauritania, Abyssinia, of the Piratical
States, and the Hottentots, with a group-
ed view of its uncivilized settlements.

EUROPE.

The European part, contains the his-
tory of Greece and Rome, from their
origin to their dissolution—of the various
nations which were conquered by them—
and of the nations by which the Romans
themselves were finally conquered, and
of the nations which were formed from
the fragments of the Roman Empire, and
the various revolutions of the latter, to-
gether with a view of the nations which
never were subjected to the Romans.

AMERICA.

The American part, contains a general
history of the Western continent, under
the heads of Free, European, and Ab-
riginal or unconquered America. The
first contains a history of the United
States, from their first settlement as
English Colonies, till the present time.—
The second, of all parts dependant on
Europe. And the third, of all that are
still owned by the Aborigines.
It is expected that the whole will be
comprised in 10 or 12 octavo volumes,
of between four and five hundred pages
each—to be printed in Philadelphia,
on good paper and fair types, for $3
1-3 per volume, in sheep binding, or
$4 1-3 Calf Gilt, to be paid for on deli-
very.

AUTHORITIES.

This work has been in contemplation
upwards of 40 years. The project of
it was conceived in 1786, on reading the
Universal History, then recently edited
in 60 volumes, by a society of gentlemen
in England. The original idea of ex-
tracting the quintessence of that vo-
luminous work, which contained the
most complete system of history the
world had then seen, has ever since
been enlarging and improving by an
attentive perusal of the histories writ-
ten by Robertson, Hume, Gibbon, and o-
ther modern authors—of the Asiatic re-
searches—of the works of Sir William
Jones, and other learned Orientalists—
the publications of intelligent travellers,
who, in the course of the last half cen-
tury have explored almost every region
of the Globe. These collectively have
thrown a blaze of light on countries com
paratively unknown, and on portions,
both of ancient and modern history which
were confused and obscure at the period
when the writers of the Universal Histo-
ry published their work. The arrange-
ment of materials collected from these
sources commenced in the year 1780,
when, in consequence of the surrender
of Charleston to Sir Henry Clinton, the
author was suddenly released from a sea
of business and sent as a prisoner of war
to the British Garrison then in St. Au-
gustine, and there confined for eleven
months, without any peculiar employ-
ment. Steady progress has been made
for the last ten years in correcting and
transcribing the work for publication.

UNITED STATES.

The History of the United States is
given at full length—that of foreign coun-
tries is more or less expended or con-
tracted in proportion to the intrinsic im-
portance of each—its tendency to illus-
trate portions of Holy Writ—the Greek
and Latin Classics—and also in propor-
tion to its connexion with the U. States,
or as furnishing useful practical infor-
mation to its citizens, or as the paternal
soil of their ancestors.
The above sketch of the nature and
objects of this immense work, which has
occupied the attention of the Author for
upwards of 40 years, was found among
his papers, and is now given to the pub-
lic in his own words. Since that period,
a few chapters have been added by the
Reverend SAMUEL STANHOPE SMITH,
which brings it down to the close of the
last war.
The publication commences with a
third impression of the History of the U.
States, in three volumes, which is all that
has ever appeared. The whole will not
be delivered under 15 or 20 months. It
is proper to state, that the gentlemen
who have the direction of it are neither
booksellers nor printers, and receive no
pecuniary consideration for their trouble
—but are willing to make the necessary
advances to carry it into execution provi-
ded the sale is warranted by public pa-
tronage. The profits arising are to be
appropriated for the support and educa-
tion of his children, four in each state to
them its success is a matter of deep im-
portance.

Miscellany.

THE PUNISHMENT OF INGRATITUDE.

A French writer relates the following remarkable instance of ingratitude in children:

An eminent trader at Lyons, who had acquired an easy fortune, had two handsome daughters, between whom, on their marriage, he divided all his property, on condition that he should pass the summer with one, and the winter with the other. Before the end of the first year, he found sufficient ground to conclude, that he was not a very acceptable guest to either; of which he however took no notice, but hired a handsome lodging in which he resided a few weeks—he then applied to a friend and told him the truth of the matter, desiring the gift of two hundred livres, and the loan of fifty thousand in ready money for a few hours. His friend very readily complied with this request: and the next day the old gentleman made a very splendid entertainment, to which his daughters and their husbands were invited. Just as dinner was over, his friend came in a great hurry; told him of an unexpected demand upon him, and desired to know whether he could lend him fifty thousand livres. The old man told him without any emotion that twice as much was at his service, if he wanted it; and going into the next room, brought him the money. After this, he was not suffered to stay any longer in lodgings; his daughters were jealous, if he stayed a day more in one house than the other; and after three or four years spent with them, he died; when upon examining his cabinet, instead of livres, there was found a note containing these words:—"He who has suffered by his virtues has a right to avail himself of the vices of those by whom he has been injured; and a father ought never to be so fond of his children, as to forget what is due to himself."

A LA MODE DE ARAB.

Yesterday morning we had rather a curious and singular spectacle in the street of this city. A man dressed in a hunter's shirt, accompanied by a woman leading a horse, appeared before us. On the horse was a sack bag thrown over—and in each end of the bag peeped out the heads of two children. The little creatures were so arranged, that the two in each end were placed back to back, so that two looked towards the end of the horse, and two towards the tail. One of them was an infant; for while the mother held the rein, she presented her bosom and gave suck to the little urchin, as it nestled in the sack. The heads of the children now sunk almost out of sight, and then popped up like young robbins in a nest. The whole cavalcade was singularly amusing to those who saw it. We have often seen a horse *carry double*—but never before this occasion have we seen one carry quadruple. It was rather a singular mode of riding, and certainly somewhat inconvenient to the riders; but I defy any one to have seen a more summary or cheaper mode of travelling.

ECCENTRIC BIOGRAPHY.

Zeno, a philosopher, and founder of the sect of stoics, so called from his opening a school in the portico of Stoa, in Athens. He was born at Citium, in the Isle of Cyprus; but being driven by a storm on the coast of Africa, he took up his residence there, and taught philosophy and logic—he was indeed the first person who brought logic to perfection. His principles, it is said, maintained the right of self-murder, and his servant being told that the plea of fate would exculpate him from any crime he should commit, exclaimed to Zeno, as he was beating him for theft—"It is my fate to be a thief." "Yes, sirrah," replied his master, "and it is your fate to be drubbed for it."

A REPORT.

Lord B. who sports a ferocious pair of whiskers, meeting Mr. Curran in Dublin, the latter said, "When do you mean to place your whiskers on the *peace establishment?*" The former replied, "When you place your tongue on the *civil list.*"

The navigation law, however, experienced a better fate. It met with but little opposition, and was supported with great ability by Mr. Pitkin. The question on it nevertheless was taken by yeas and nays, and there were 123 yeas to but 16 nays.

The bill for incorporating the Mechanic Relief Society of Alexandria, passed the House of Representatives on Friday last, and only waits the signature of the President to become a law.

FROM SOUTH AMERICA.

Capt. Liddle, of the schr. Tom, arrived at this port from La Guayra, states, that two days before sailing, accounts were received of the defeat of the Patriots about 30 miles beyond the city of Caraccas—the Royalists represented it a complete rout, stating to have made 500 prisoners, who were all put to the sword, and had taken 800 horses, with the principal part of the baggage, and Bolivar's private baggage: 300 women, attached to the Patriot army, were found the next morning in the mountains, by the Royalist army. The particulars had just been published, but capt. L. could not obtain a copy, nor could he learn that any officer of distinction was among the prisoners. It was stated that a *ruse de guerre* had been effected by Morillo, by abandoning Calabosa; that he drew the Patriots into an ambush between two mountains. Morillo had been wounded in an action previous to the last.

INDIAN NEWS.

In the Savannah Museum, of the 4th instant received by the sloop Adeline, we find a number of letters from gen. W. M'Intosh, commanding the friendly Creek Indians, to the U. States' factor at Fort Mitchell, in which he details his operations against the hostile Indians.—He left Fort Mitchell on the 26th Feb. and four days after he took 3 hostile Indians, who had been engaged in firing upon our boats as they descended the Flint river. He took them to the commanding officer at Fort Gaines, who refused to have any thing to do with them, and they were accordingly dealt with according to the rules of Indian warfare—that is put to death. From the 2d to the 10th ult. M'Intosh was reinforced by about 20 of the hostile Indians, who came in under the white flag, and joined him. From these Indians he obtained information of a collection of warriors under the command of the Red Ground Chief on the Chaubullee creek. On approaching their station, on the 12th ultimo, he says, "the creek swamp was so bad we could not pass it for the high water: my men were compelled to leave their clothes and provisions, and swim better than one half of the swamp, about 6 miles wide; we marched within about two miles of his station, and the next morning we surrounded his place; but he was gone, and we could not follow him till we could get some provisions we had left behind us; myself and major Hawkins followed him and overtook his party, and he got away from us with about 30 men. We have taken 58 men and about 180 women and children prisoners, without the fire of a gun, and we killed 10 men who broke to try and make their escape. I have not lost a man since I left Fort Mitchell. He would not have got away from us, but he had some cattle on hand which he tried to drive out of our way—so I sent 100 men to take him and his cattle; when they came in sight, he and his party being well mounted on horses, they got away; we got what cattle he had with him. We are very scarce of provisions, and I have to send the women and children up into our nation—as for the men, I am going to take them to Gen. Jackson. Now there is no danger on the west side of the Chatahoochie river, as this was all the party that was on this side—we have to look for our enemy on the east side of the river now."

From the Richmond Inquirer April 10.

LATEST FROM THE ARMY.

The following is an extract of a letter from a friend, conveying parts of a letter he had received from an officer in the suite of Gen Gaines. It is by several days the latest account we have from the Southern Army:

"——had not time to give me any of the details of Gen. Gaines's late adventure. Poor Wright and four men were lost. His letter (the officer with Gen. G) is dated 'Camp Appalachicola, *East Florida*, 13th March, 1818.' He says, 'We 'entered the *Spanish* province on the '10th, and from the want of supplies 'have been driven in this direction, where 'we had the good fortune to find a boat 'load of provision from the Bay, sufficient for —— days' rations for the army. We have suffered as much as ever men did.'

"He does not say what is the object of the present movement—though 'quints somewhat towards St. Augustine. I should not infer this from the president's late message to Congress; altho' I did before, and considered the possession of that place and Pensacola as the most humane, as well as expeditious mode of terminating the Indian war, and as justifiable as the occupation of Amelia Island."

Our correspondent also encloses us the following extract of a letter he had received from St. Stephens, in the Mississippi state, dated the 22d February:

'The Choctaw Indians are rendezvousing here for the purpose of acting a 'gainst the Seminoles. A considerable 'party has already assembled. They entertain a deadly animosity against the 'Creeks.'

How much injury have we sustained by the want of supplies, during the late war, as well as this southern campaign! One detachment of the militia, which was in the field, was able to effect nothing from the want of bread. The soldier must eat in order to fight. He has enough to do to combat one enemy at a time. Famine is as formidable an adversary as the sword. We supply our troops principally by contract. This is subject to these two objections; that the contractor, to make the most money, will sometimes buy the *worst* provisions; and sometimes waiting for a fall of the price, buys none at all. It is in vain the officer has this check upon the contractor—that in case of a defect of provisions, he can buy them at any price at the contractor's cost: because when the pinch comes, the provisions cannot always be procured.—Thus the precious moments are lost, campaigns are spun out, and the best plans are defeated by delay. More than twelve months past, Gen. Gaines protested, if we are not mistaken, against this mode of supply—and recommended, in lieu of it, the organization of an excellent commissariat. In fact, we must have recourse to it at last.—France, which excelled the rest of the world in the art of war, was remarkable for nothing more than the excellence of her commissariat department.

[Our readers will observe, on turning to the Gazette of Thursday last, that the establishment of a commissariat, so properly recommended by the editor of the Inquirer, was discussed in the House of Representatives on the 7th inst. and the bill ordered to a third reading. It will probably pass.]—*Ed. Alex. Gazette.*

FROM GIBRALTAR.

Captain Webber, who arrived here yesterday from Gibraltar, sailed March 10. The dreadful Algerine story was invalidated by letters from the British consul, which said nothing of it.

The wife of prince Charles, brother to the king of Spain, and daughter of the king of Portugal, has been delivered of a prince.

None of the American squadron had been at Gibraltar for some time, nor was it known where they were.

The Russian squadron had arrived at Cadiz.

Captain W. brought despatches from our ambassador at Madrid.

Gibraltar, March 2.

Markets very dull. Tobacco is again depressed, owing principally to the large parcels of damaged sold by auction.—Rice—no offers for about 12 or 1300 tierces arrived in our bay, in consequence of being turned off from the Spanish ports, coming from Charleston—the last sales were at $7 50 per 112 lbs. for 100 tierces, per rapid. Flour is steady at $10—sales were made on the 26th of 400 bbls. at $10 1-8. Codfish will not command more than the quotation, and is dull at that price. Fruit very scarce, both here and at Malaga—small parcels are selling at the quotations.

The brig Eliza, Reilly, from Norfolk, has arrived at Malaga.

A letter from Gibraltar, March 4, from Mr. Sprague, mentions that flour has been $9 25—was up again to 10 a 10 25; southern corn 2 50 per fanega, northern 2 75 a 3; rice 7 25, sales; brandies very high; dollars 2 a 2 1-2 per cent p. U. S. bills par.

Exchange on London 54 1-2 a 55d;—dollars 2 a 2 1-2 adv.; U. S. bills par.

Extract of a letter from captain Tracey, of ship Galer, dated

London, February 1.

Since I last wrote you I have had a most vexing piece of business in consequence of a steerage passenger, an Irishman, having shipped 18 bbls. pitch, in which he had about 60 lbs. pigtail tobacco concealed: the consequence was, that although the owner or master could not have any knowledge or even suspicion of the transaction, it makes the ship liable to confiscation, and had I not been well known at the custom house and had some personal friends at the board, it would probably have detained me three months, and subjected me to great expense. As it is, I have not been prevented from discharging and clearing, which I consider a particular favor.

LATEST FROM INDIA.

On Monday last the ship Fawn, capt. Austin, arrived at Boston, 110 days from Bombay. On her passage she touched at St. Helena, "and was boarded by an officer from the flag ship, who reported that provisions were very scarce, and that the inhabitants of the island were on half allowance. No fresh provisions to be had. The emperor was seldom seen, and was gloomy in the extreme."

The following intelligence from India, received by the Fawn, will be read with interest. We copy it from the Boston Palladium of Tuesday:

Captain Austin, who arrived yesterday from Bombay, favored us with papers to the 13th December, and manuscript accounts of a revolt against the British by the rajah of Berar, whose troops, consisting of upwards of 20,000 men, made a treacherous attack on the British forces at Nagpore on the night of the 28th of November, but were completely defeated, and the rajah sued for peace again. The British force is stated at only 1500 men, and had few killed and wounded.

The above event was preceded by the revolt of the paishwa of Poonah, and a battle, in which he was defeated with the loss of 500 men. His forces at the time consisted of 30,000—that of the British 3000. The war with him continued.

The British obtained a victory over another enemy [Mahrattas] at Keerkee about the 5th of November.

Hostilities still existed with the Pandarees; and different exigencies caused movements of troops in various directions.

Captain Austin sailed from Bombay on the 27th of December, and informs that the inhabitants of the country between Madras and Bombay were in a state of insurrection, and committing many murders and other outrages. The earl of Moira was marching against them with 90,000 troops. Every European officer and soldier had left Bombay to join the army.

Kingston, Jam. Feb. 18.

The plundering of his majesty's sloop Martin, lately wrecked on the south coast of Ireland, is thus related on the authority of the officers: As soon as the ship was on shore, the country people assembled in great numbers, and the work of plunder began. A person standing by, who seemed to have some influence, advised captain Mitchell to retire to an adjoining house with his officers and crew, otherwise they would certainly be all murdered; this he declined, being determined to protect the property to the last. In this attempt Mr. Turner (the first lieutenant) was knocked down—one fellow took up a large stone, and threatened to murder captain Mitchell if he did not retire, exclaimed, "You damned rascal, have you not saved your life, is not that enough for you?" In short, they were overpowered, and every thing as it drove on shore from the wreck was carried off by force, until the police, with lieutenant Wilson and a party of the 93d arrived—they were not uncalled for, as you state—they were sent express for by captain Mitchell, who declares it to be his opinion, that if it had not been for them he and the greater part of his crew would have been torn to pieces. Mr. Blake (2d lieutenant) got on shore with only his shirt, flannel waistcoat, and trowsers; he got into a house, where he stripped, got into bed, and requested his things might be dried for him, but he never saw them more, and was obliged to lie in bed naked until he got a supply of clothing from Limerick.

Sully for Sale.

THIS Estate, situated in the county of Fairfax, twenty two miles from Alexandria, and the same distance from Georgetown, contains about seven hundred and fifty acres. Little River Turnpike passes through it half a mile from the dwelling house. The situation is handsome, and remarkably healthy; the water is good and abundant. The soil which was originally excellent, has for some years past had the advantage of improving husbandry, Plaister of Paris acting with powerful and immediate effect on all grasses and grains. The fields present a good surface for cultivation, and those now untilled are covered with red clover. The orchards are very large and thrifty; the collection of table fruit is copious and various. The mansion is spacious and well constructed: the outhouses are conveniently situated, and the whole have been lately thoroughly repaired and painted. The farm houses which are all nearly new, are expensive and excellent in their kind.

For a gentleman of leisure this would be a delightful residence; and a profitable estate for an active farmer. The title is indisputable, and perfectly unincumbered.

A number of well taught orderly young men, with good stocks and farming utensils of all kinds and the crops of the present year if desired, will be at the command of the purchaser.

Application may be made to the subscriber, living on the premises, near the post-office at Pleasant Valley, in Fairfax.

French Creek Boarding School.

The following is published for the information of Parents:

HAVING long believed that a School on a plan different from most others in many respects, would be beneficial to society, and apprehending that with all its cares, and the responsibility inseparable from such a concern, I could more cheerfully devote my time to the education of children than to any other business, I have concluded to establish a BOARDING SCHOOL for GIRLS.—With this view I have purchased the FRENCH CREEK FARM, four miles east of the yellow springs, on the Norristown and Philadelphia road, situated in Pikeland and Vincent townships, Chester county, twenty-seven miles from Philadelphia, combining many conveniencies for the support of such an institution; and having let the farm, etc. in a way calculated to supply the family with provisions, I propose to devote my attention, with the aid of suitable assistants, to the education of the children who may be placed under my care.

In selecting the pupils, it is not proposed to be governed entirely by their ages, nor to require that they shall all be members of the religious society of Friends; but as the school rules will be very few in number and very simple, it is my wish that none may be sent contrary to their own inclination, nor any one who would not be likely to be good examples to the other scholars, and treat them with kindness and affection.

The price for board and tuition will be two hundred Dollars per annum, one quarter always to be paid in advance—no restrictions respecting the kind of clothing are intended, nor respecting the frequency of the changes that parents may require; the washing will be charged at the ordinary price per dozen—children may be admitted for one quarter only, and such as are entered for a longer period, may nevertheless be removed at the expiration of any quarter.—The communication with Philadelphia will be frequent and easy by stage, and a house of entertainment kept by the farmer for the accommodation of persons having business at the school.

Reading, Writing, Arithmetic, English Grammar, Geography and the use of Maps and globes, will be taught, together with such other branches as the progress of the children and experience may render expedient. The school to open the first of the 5th month next. For further information apply to Edward Stabler, Alexandria, or to

Fan- ash Making

METAL FAN-SASHES, of various descriptions, will be made by the subscriber, at his shop, lower end of Duke street. The want of a Metal Fan Sash Manufactory in Alexandria, has hitherto been severely felt by builders and others, who have been compelled to make use of wood, which is neither elegant nor durable. The various forms into which the metal can be shaped have given it a decided superiority, and the difference in the price is very trifling. The subscriber has been at considerable expence in procuring the necessary preparations, and relies on public enterprise for success in the undertaking.

Gentlemen in the country, by sending the dimensions of their sashes, can have them made at the same price as if in town.

James Kennedy & Son,

RESPECTFULLY inform the public that they have just received from *LEE'S MEDICINE STORE,* No. 46, Maiden lane, New-York a fresh supply of the following valuable MEDICINES:

Hamilton's Worm destroying Lozenges.

Which have within sixteen years past cured an immense number of persons of both sexes of every age and in every situation, of various dangerous complaints arising from WORMS, and from obstructions or foulness in the stomach and bowels.

This medicine bears no analogy whatever to others of similar titles so commonly complained of as operating with violence; on the contrary a particular excellence of this remedy is its being suited to every age and constitution. It contains nothing but what is perfectly innocent & is so mild in its operation that it cannot injure the most delicate pregnant lady or the tenderest infant of a week old should no worms exist in the body; but will without pain or griping cleanse the stomach and bowels of whatever is foul or offensive, and thereby prevent the production of worms and many fatal disorders. The lozenges are particularly efficacious in carrying off all gross humours and eruptions, feverish and bilious complaints, and are the safest and mildest purgative that can be used on any occasion.

Description of Worms, and the symptoms by which they are known.

Worms which infest the human body are chiefly of four kinds viz.—The Teres or large round worm; the Ascarides or small maw-worm; the Cucurbitine or short flat white worm; and lastly, the Tænia or tape-worm, so called from its resemblance to tape. This is often many yards long and is full of joints. It is most hurtful and most difficult to remove.

Among the symptoms attending worms are—disagreeable breath, especially in the morning; bad and corrupted gums; itching in the nose, and about the seat; convulsions, epileptic fits, and sometimes privation of speech; starting and grinding of the teeth in sleep; irregular appetite, sometimes loathing food and sometimes voracious; purging with slimy and fœtid stools; vomiting; large and hard belly; pains and sickness at the stomach; pains in the head and thighs and lowness of spirits; slow fever with small and irregular pulse; a dry cough; excessive thirst; sometimes pale and unhealthy countenance, and sometimes the face bloated and flushed.

Persons afflicted with any of the above symptoms should have immediate recourse to Hamilton's Worm Destroying Lozenges, which have been constantly attended with success in all complaints similar to those above described.

A dose of this medicine given occasionally during the warm season, will effectually prevent "the vomiting and purging of children"—a dreadful disorder, which annually destroys thousands of the infant part of our citizens. It is likewise the mildest and most certain remedy known, and has restored to health and strength a great number when in an advanced stage of this fatal complaint. Particular and plain instructions are given for every part of the necessary treatment in such cases.

Children generally take this medicine with eagerness; having a pleasing appearance, and an agreeable taste.

The Restorative Powder for the Teeth and Gums.

For the prevention and cure of BILIOUS AND MALIGNANT FEVERS is recommended

HAHN'S ANTI-BILIOUS PILLS

THIS Medicine has been attended with a degree of success highly gratifying to the inventor's feelings in several parts of the West Indies and in the Southern and Middle States, &c.

The testimony of a number of persons can be adduced, who have reason to believe that a timely use of this salutary remedy has, under Providence, preserved their lives when in the most alarming circumstances.

Facts of this conclusive nature speak more in favour of a medicine than columns of pompous eulogy founded on mere assertion.

It is not indeed presumptuously proposed as an infallible cure, but the inventor has every possible reason that can result from extensive experience for believing that a dose of these Pills taken once in every two weeks during the prevalence of our bilious fevers, will prove an infallible preventive; and further, that in the earlier stages of those diseases their use will very generally succeed in restoring health, and frequently in cases esteemed desperate and beyond the power of common remedies.

The operation of these pills is perfectly mild, so as to be used with safety by persons in every situation and of every age.

They are excellently adapted to carry off superfluous bile and prevent its morbid secretions—to restore and amend the appetite—to produce a free perspiration and thereby prevent colds which are often of fatal consequences. A dose never fails to remove a cold if taken on its first appearance: they are celebrated for removing habitual costiveness—sickness at the stomach and severe head-ache—and ought to be taken by all persons on a change of climate.

They have been found remarkably efficacious in preventing and curing disorders attendant on long voyages, and should be procured and carefully preserved for use by every seaman.
